Title: Hanhart CXD

Created: 2021

Hanhart CXD - World's first NFT Hybrid
UNICAT

The renowned watch manufacturer Hanhart from the Black Forest is combining real craftsmanship of the highest precision with the digital world for the first time. It is a completely new design based on the idea of blockchain. In addition to the digital design, the result of a long process of development, the buyer of the NFT also receives the right to have the Hanhart CXD manufactured as a unique piece. This unique, exclusive right to build this watch is securitized in a second NFT. The option to produce the watch can be exercised until December 31, 2022 for a price of 37,800 Euro. Personal wishes regarding specifications in the design (color and type of stones) can be coordinated with the Hanhart company. Both NFTs can be traded separately after the purchase. After December 31, 2022 or after the realization of the Hanhart CXD, the NFT with the option to produce the watch will be "burned" and loses its validity.

"Blockchain and cyberspace were the defining themes in the development of the watch. The design of the blocks lining up reflects the blockchain and merges into the case. The name CXD comes from the sequence of characters that best reflects the infinity symbol ∞ and represents the infinite expanses of cyberspace," says Felix Wallner, managing director of Hanhart.

Technical details of the Hanhart CXD

Case:

Titanium grade 5

Diameter 40 mm

Convex sapphire crystal printed from the inside with anti-reflective coating

Sapphire crystal caseback

Height 14 mm

Water resistant 10 bar/10 ATM

Screw down case back

Serial number 1/1
Crown with modern Hanhart h

Movement:
Sellita SW 300 with Hanhart rotor
Automatic winding with ball bearing
28'800 vibrations per hour (4 Hz)
25 jewels
42 hours power reserve

Functions:
Hours, minutes and center seconds
Stop-seconds function

Dial:
Set with 60 hand-cut stones
Stone type and therefore color is selected with the NFT owner
Base price includes hand-cut glass stones

Bracelet:
Vulcanized rubber with Hanhart logo
Lug width 20 mm

Production price of the watch: 37.800 Euro incl. 19% VAT*
* Base price includes hand-cut glass stones

Since its foundation, Hanhart has stood for innovation and built one of the tools for aeronautical progress with its high-precision pilot watches, some of which are still in use today.

The creation of the NFT as well as the technical processing is carried out by the company [Time To Token IT GmbH](#) in Cologne, which specializes in tokenization.

Owner: Hanhart
Token Type: NFT (ERC-721)
Token ID: 87502765224358460218628164
Blockchain: Ethereum
Minted by: Time To Token GmbH

In addition to our GTC, the special conditions for auctions of NFTs also apply. You can find them [here](#).

Certificate: https://arweave.net/4Ez_o5-aXclZHvA44jzkhc1UfW4EDMShJie8G_ea8IE
Token ID of the 2nd NFT: 24629838803644297328717003170953892031588

Condition Report
Summary: Excellent condition
Token Type: ERC721
Blockchain: Ethereum
Metadata Storage: On-chain (Ethereum)
Media Storage: Arweave (primary), Hanhart servers (secondary)

Technical Details

Additional Implemented Interfaces:

ERC165

ERC721Metadata

ERC721Enumerable

ERC2981

The token is a standard ERC721 token that can be listed on all NFT marketplaces.

Metadata and media data integrity is excellent:

- Token Metadata is stored on-chain and the "tokenURI" method returns a data-URL.
- Media (images, 3D models) are decentrally stored on Arweave and centrally on the creator's servers.

A 5% royalty payment to the token creator is automatically applied via:

- ERC2981 interface (used by Mintable and other marketplaces)
- Rarible 0xb7799584 interface.
- "contractURI" method used by OpenSea.

Estimate: 10.000 € - 15.000 €; Hammer: 30.000 €
