OPHTHALMOSKOPS WITH PHANTOM EYE UND 100 GLASS EYES.

Date: Ca. 1890 to 1930s.

Technique: Brass, blown glass, painted. Two etuis with glass eyes.

Measurement: H.19.5cm. Etuis: 33.5x16.5cm, 29.5x18cm.

Condition B/C. Rubbed.

The device was used to train future ophthalmologists. With the help of the phantom eye and twelve enclosed, finely painted half-shells, they could learn to identify eye diseases.

Invented in 1866 by Dr. Maurice Perrin (1826-1889).

Estimate: 1.200 € - 1.500 €; Hammer: 3.000 €
