Provenance:

- Private collection North Rhine-Westphalia

The Chromoscope is an object that must be worn like binoculars. It is an instrument with which the nocturnal landscape of large cities is to be transfigured. Its attraction is not based on the object itself, but on the visual event it creates. It is a piece that acts as a mediator between reality and our eyes, conditioning our vision to a new perception of our surroundings.

Estimate: 3.000 € - 5.000 €; Hammer: 3.000 €
