Physical artwork:
Title: "Realia I".
Date: 2022.
Technique: Video-Player (Plug-In-Player).
Measurement: 12,0 x 7,9 x 3,5cm.

Hybrid NFT (NFT + Plug & Play Videoplayer)

Realia is a collection of animated dioramas that create topographies based on satellite data. These landscapes, extracted and isolated from the world, become 3D objects, virtual materialisations of idealised countries frozen in time. The collector of the NFT also receives a plug & play video translucent device that itself plays the video of the NFT or transfers it to a larger screen. The visible electronics of the video player complement the concept of Realia by evoking a cityscape encapsulated in a glass structure, another step in the reflection on the meeting point between physical and

digital realities.

A video description of how the Plug & Play video player works can be found here: <https://gllmar.gitlab.io/videoplayer/>.

Alternatively, the lot can be offered subject to margin scheme plus an import VAT levy of 8 %.

Payment also possible with the cryptocurrency Ether (ETH).

In addition to our GTC, the special conditions for auctions of NFTs also apply.

Estimate: 5.000 € - 7.000 €; Hammer: 4.800 €
