### LARGE METAL MASS CHALICE.

Presumably Küstrin.

Date: Ca. mid-17th c.

Technique: Silver with inner and partial gilding.

Description: Broad, six-cornered foot with a curved rim, with a single indentation on the top. The centre rises on six sides and merges into a corresponding shaft with profiles and a pennant-shaped collar. Strong, only slightly depressed nodus, the six rotuli in the form of set glass stones, partly backed with coloured metal foils. Smooth, conically flared bowl with a stepped lip rim.

Weight: Ca. 680g.

Measurement: Height 25cm, Ø bottom 16,5cm.

Mark: Inspection mark presumably for Küstrin (Scheffler, Central & North Germany no.308), maker's mark "EW" lig. (unknown maker).

Prussian tax stamp for church silverware from 1809.

Estimate: 4.000 € - 6.000 €; Hammer: 4.000 €
