LAVA-STONE-CAMEO-GEMSTONE-NECKLACE.

Material: 333/- yellow gold, tested.

Total Weight: ca. 38,0 g.

Measurement: Length ca. 42,0 cm.

Gemstones: 5 oval carved lava stone cameos ca. 2.0 x 1.5 - 2.5 x 2.0 cm, cream white and blue grey. 7 faceted green coloured stones, 6 of which are round Ø approx. 0.3 cm, 1 oval 0.8 x 0.5 cm, presumably chrysop.

Description: Double-row cameo necklace with female portraits carved into textured lava stone, the central portrait decorated with plant motifs.

The proceeds will go to a charitable foundation.

Condition: traces of wear visible in keeping with its age, the small gold eyelets heavily oxidised, the gold plaques show signs of oxidation on the reverse, only slight on the front. The vegetal frame around the central cameo has tarnished greenish on both sides. Cameos are chipped/worn in places, so that the portraits no longer stand out in detail.

Estimate: 1.000 € - 1.300 €
